This program is in a really exciting stage because the beach volleyball team is so close to being one of the elite programs in the country. We cracked the top-10 for the first time this year and while we are not yet able to defeat the very best collegiate teams, I believe we are not far away.

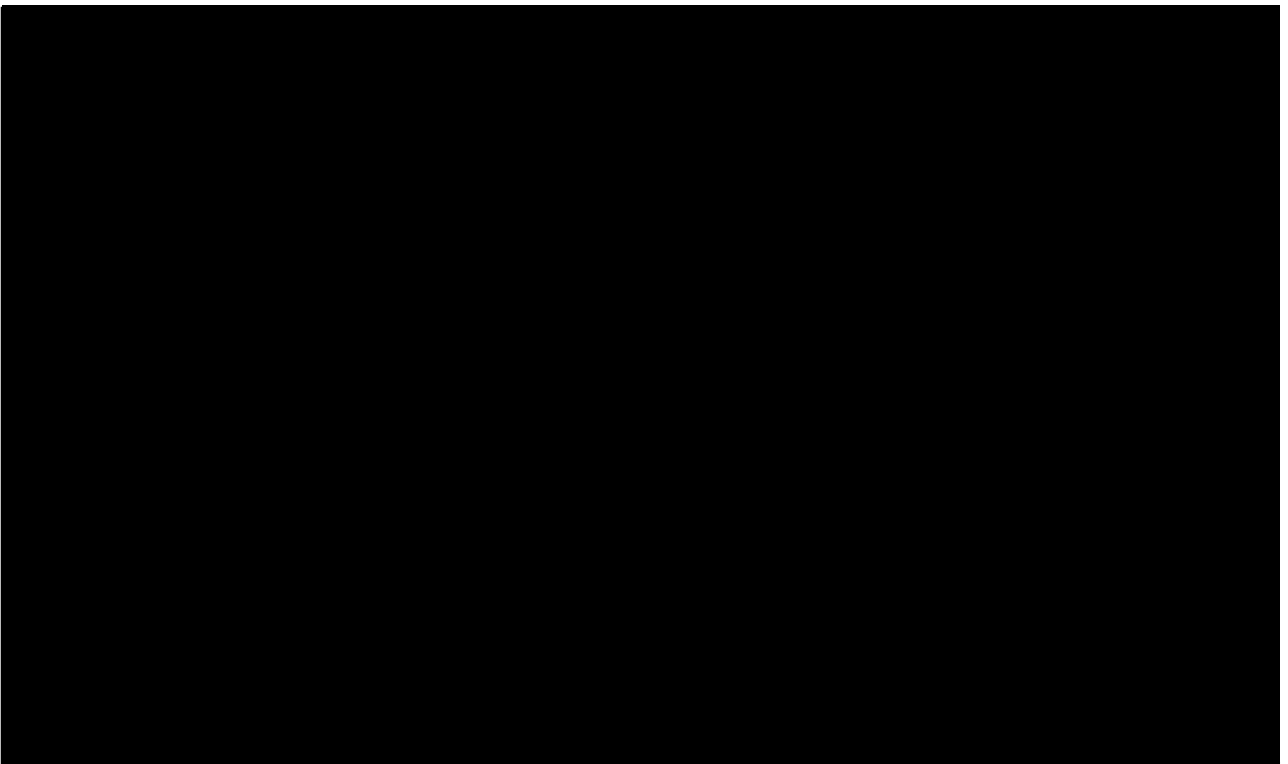

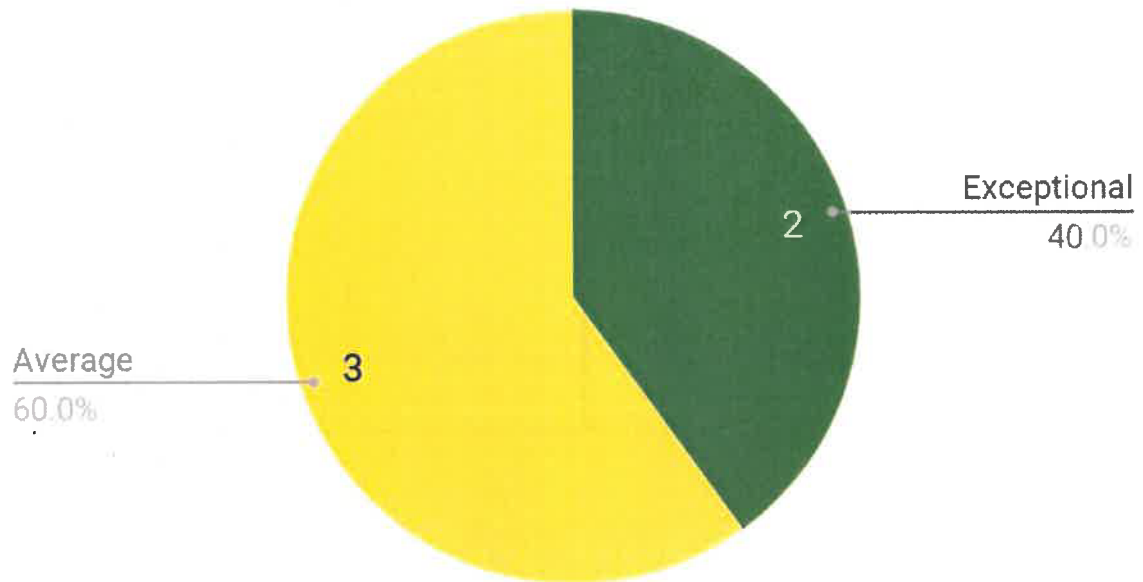

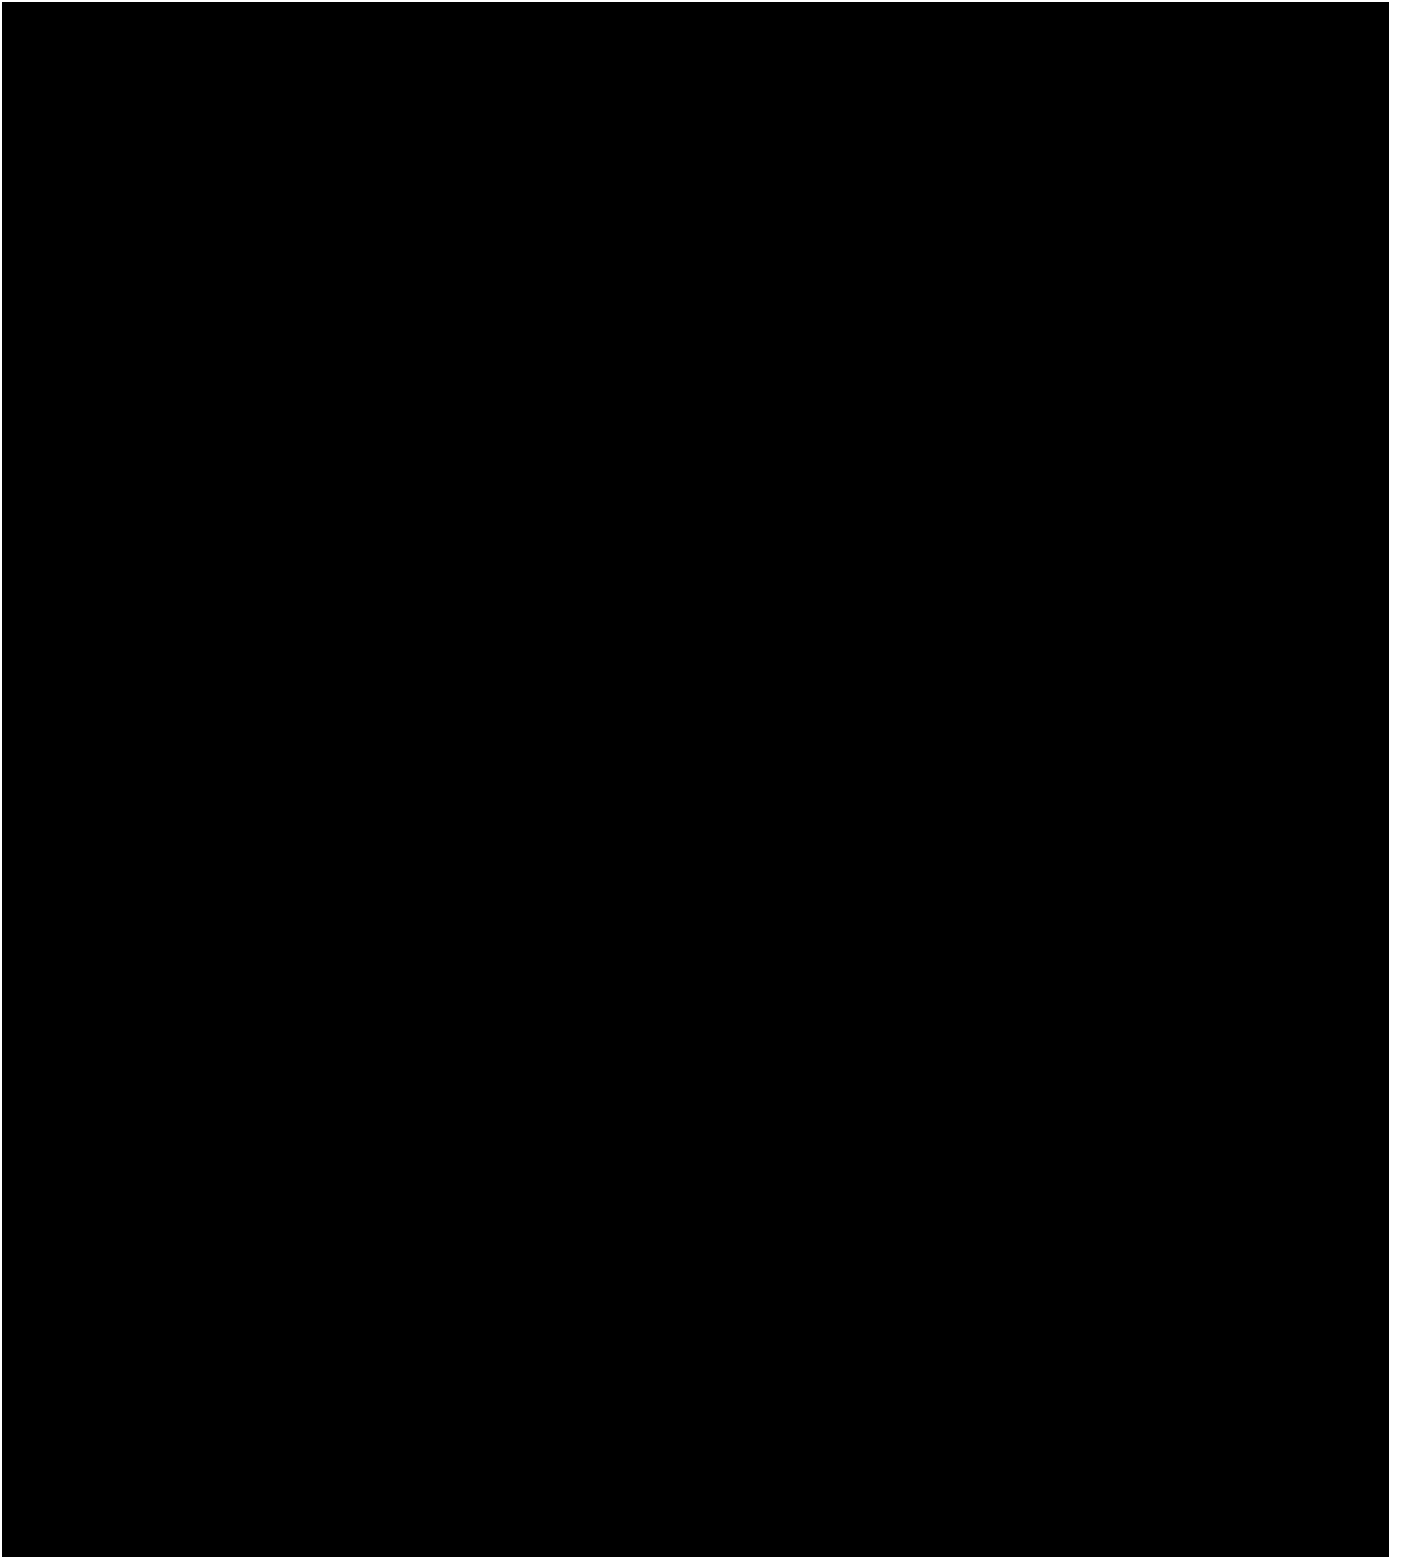

am very grateful to be apart of this program and they are a big reason I choose to stay at Cal.

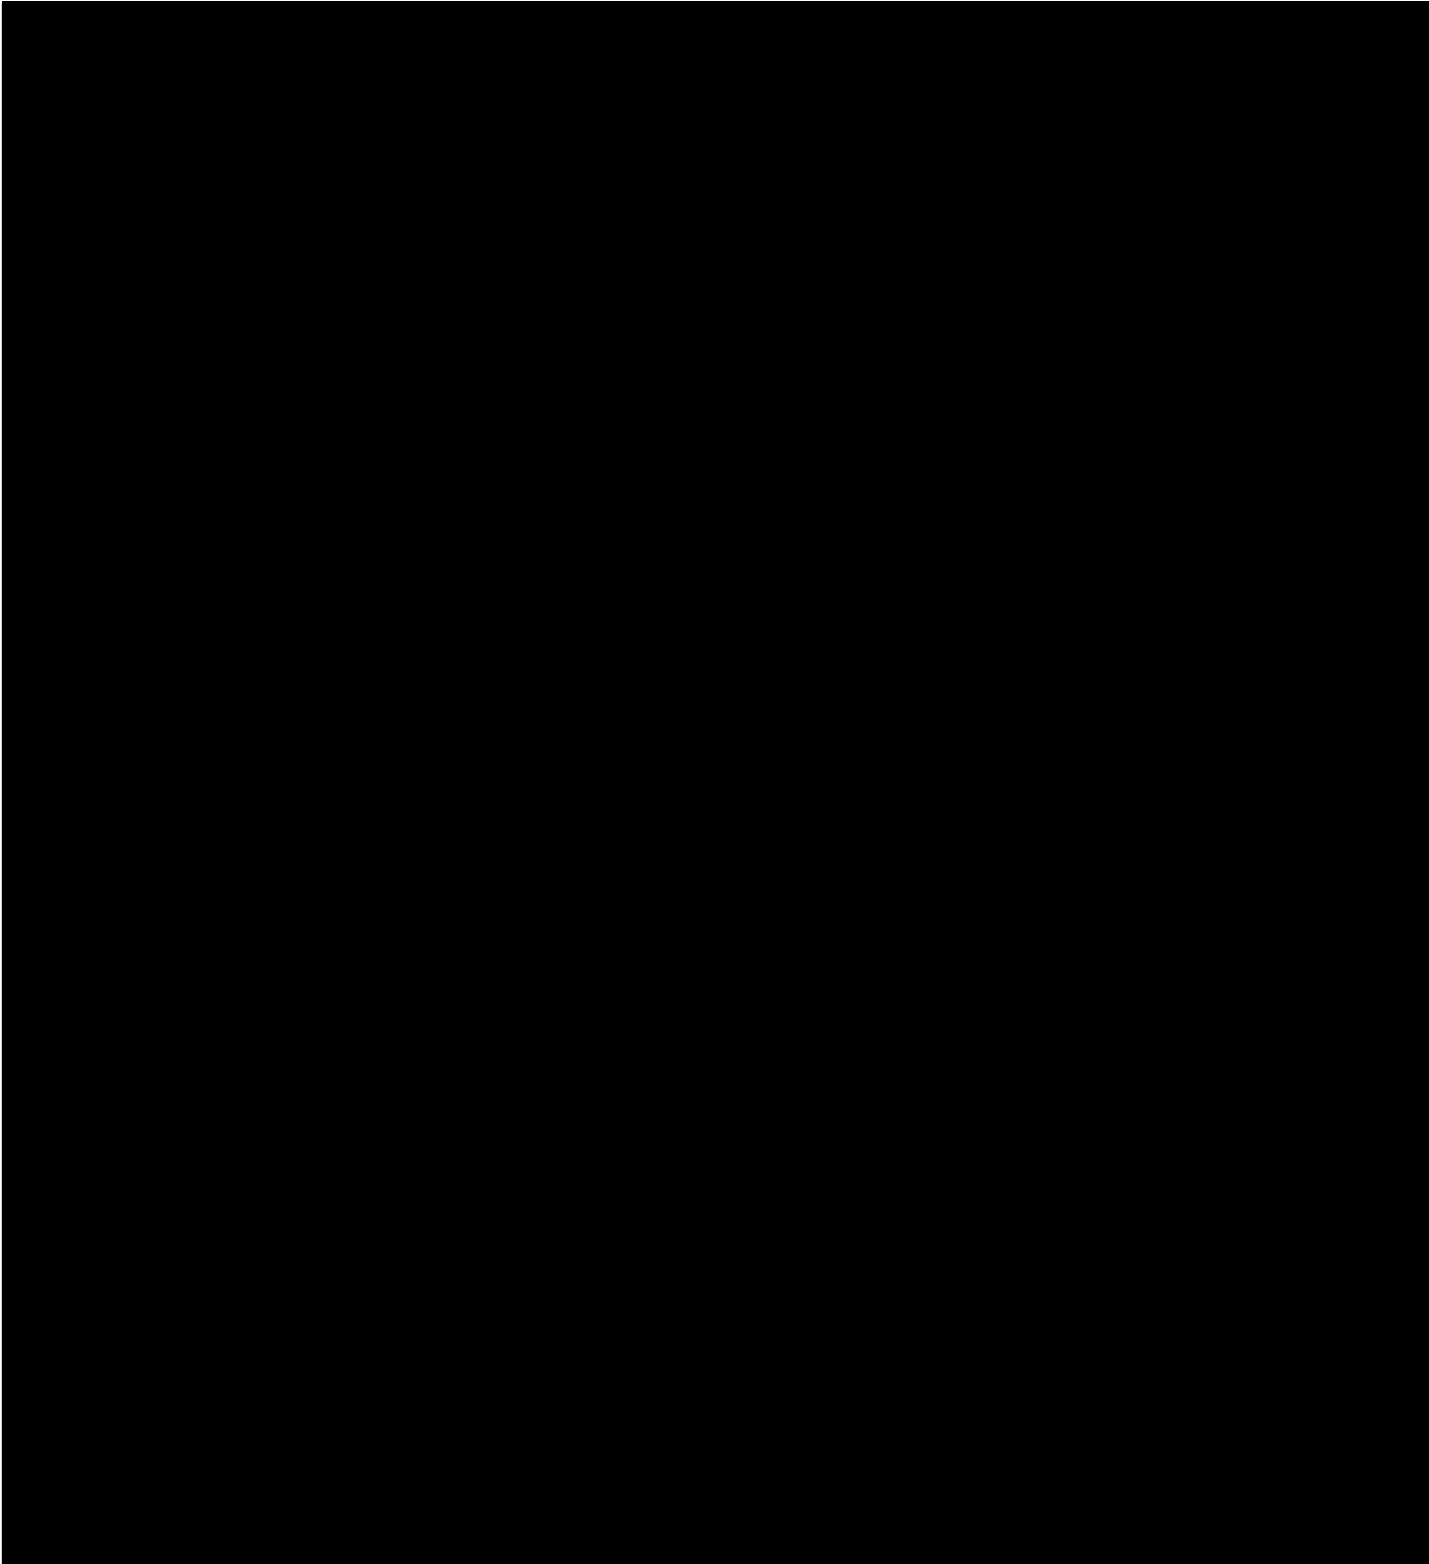

All interactions have been very good.

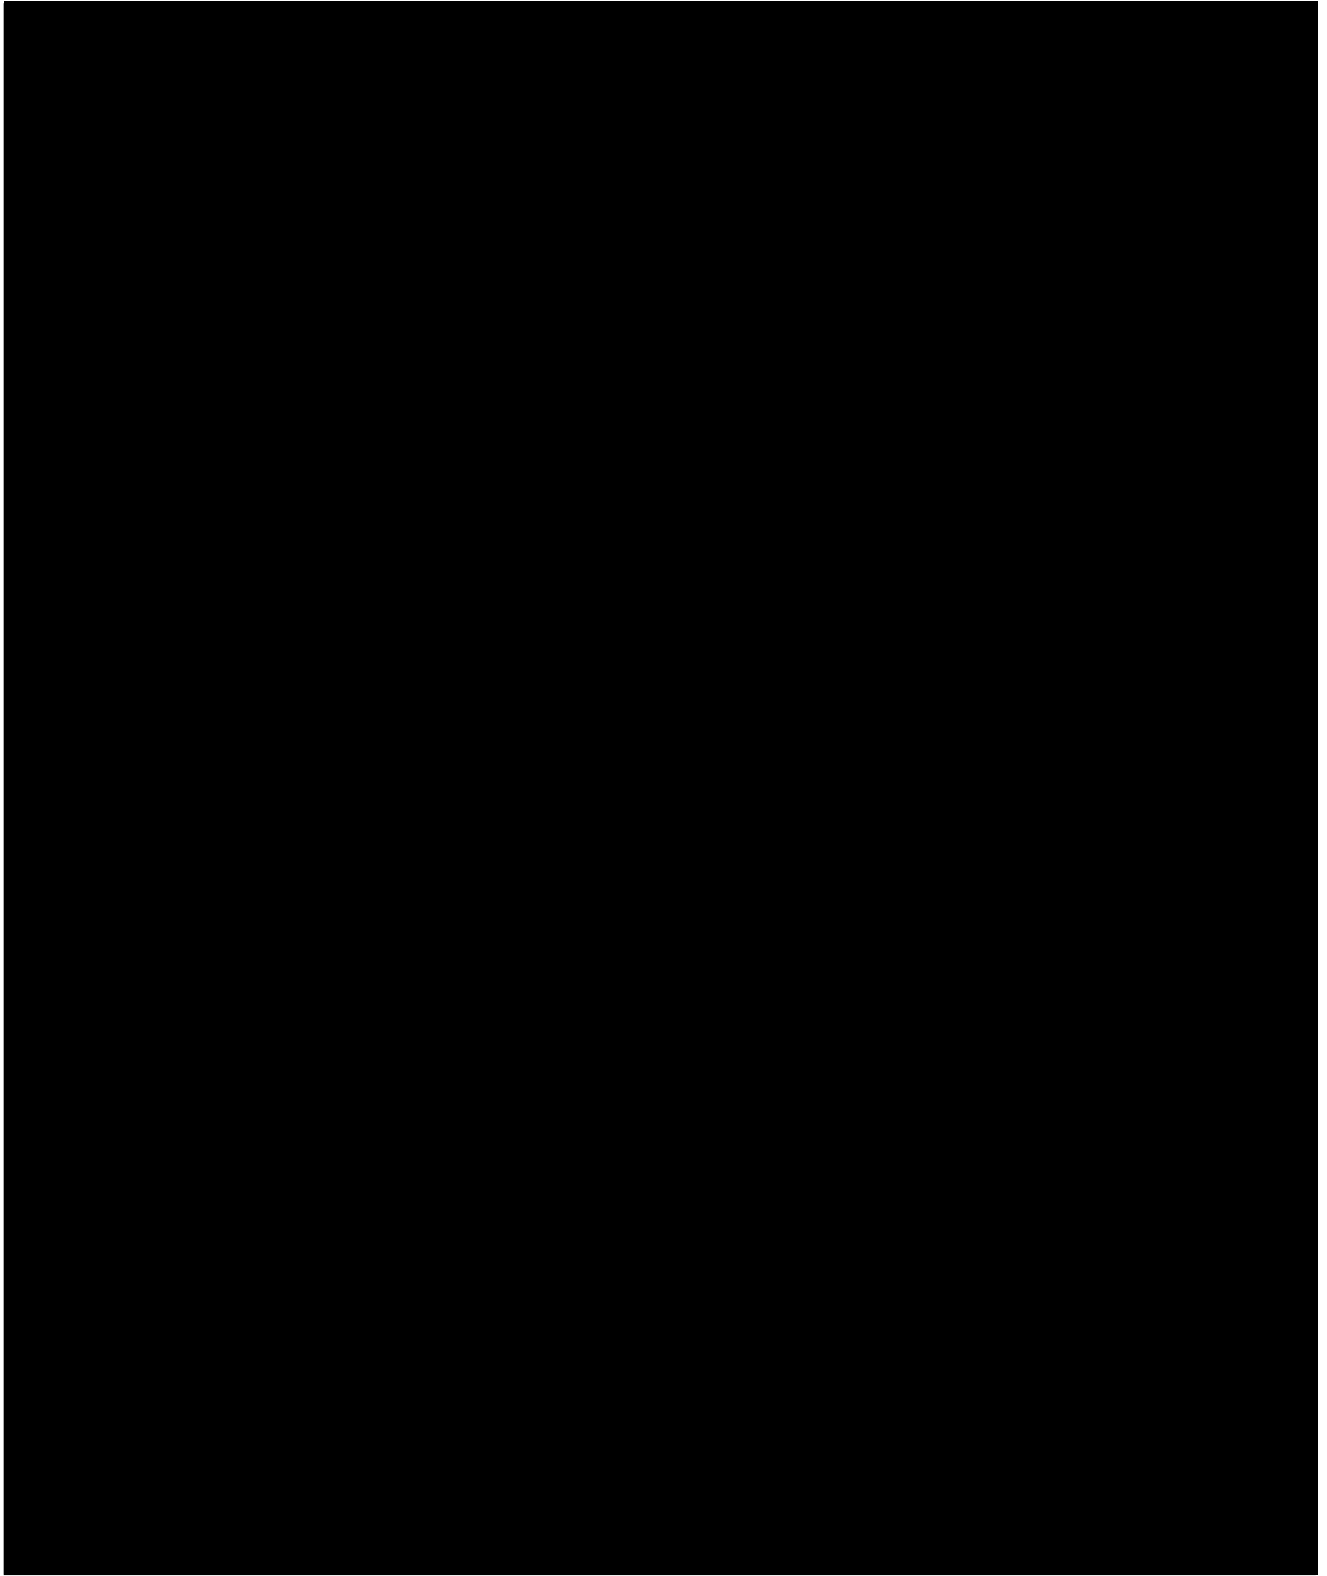

From a facilities stand point they always give me enough time to get our work done and resolve any issues that they have.
All good from my end
