

## FEEDBACK DOCUMENT

Positives	Areas for Improvement
<p>Feedback from the senior student-athletes was that their experience as being a part of the team was a special one. The level of excellence was exciting and motivating. The legacy of the program is incredible to a part of. They feel like they never settle for being anything but the best. Team culture is great. Genuinely feel like they get to row with their best friends everyday.</p>	  
<p>Senior student-athletes appreciated the ability to be the best both as students and as athletes. They really appreciated being able to work really hard on the water and then being able to focus on school during the day.</p> 	<p>Feedback from student-athletes was that it was difficult when not everyone was given a uniform to compete. They believed that everyone on the team should be given a unisuit.</p>
	
	<p>Many concerns about culture in the weight room. The weight room times are not ideal. They feel like consistently Football takes priority over Women's Rowing in terms of scheduling.</p>
	
	<p><i>"I feel this year with women's rowing was a bit of a struggle.</i></p>

[REDACTED]

*"Team seems really large and maybe a bit on different pages, just due to large squad. Just an observation and in watching, I don't really know for sure and others who are around the team might know best. Have had several academic issues and behavioral issues, but again, is a large team so that will happen. Just notable."*

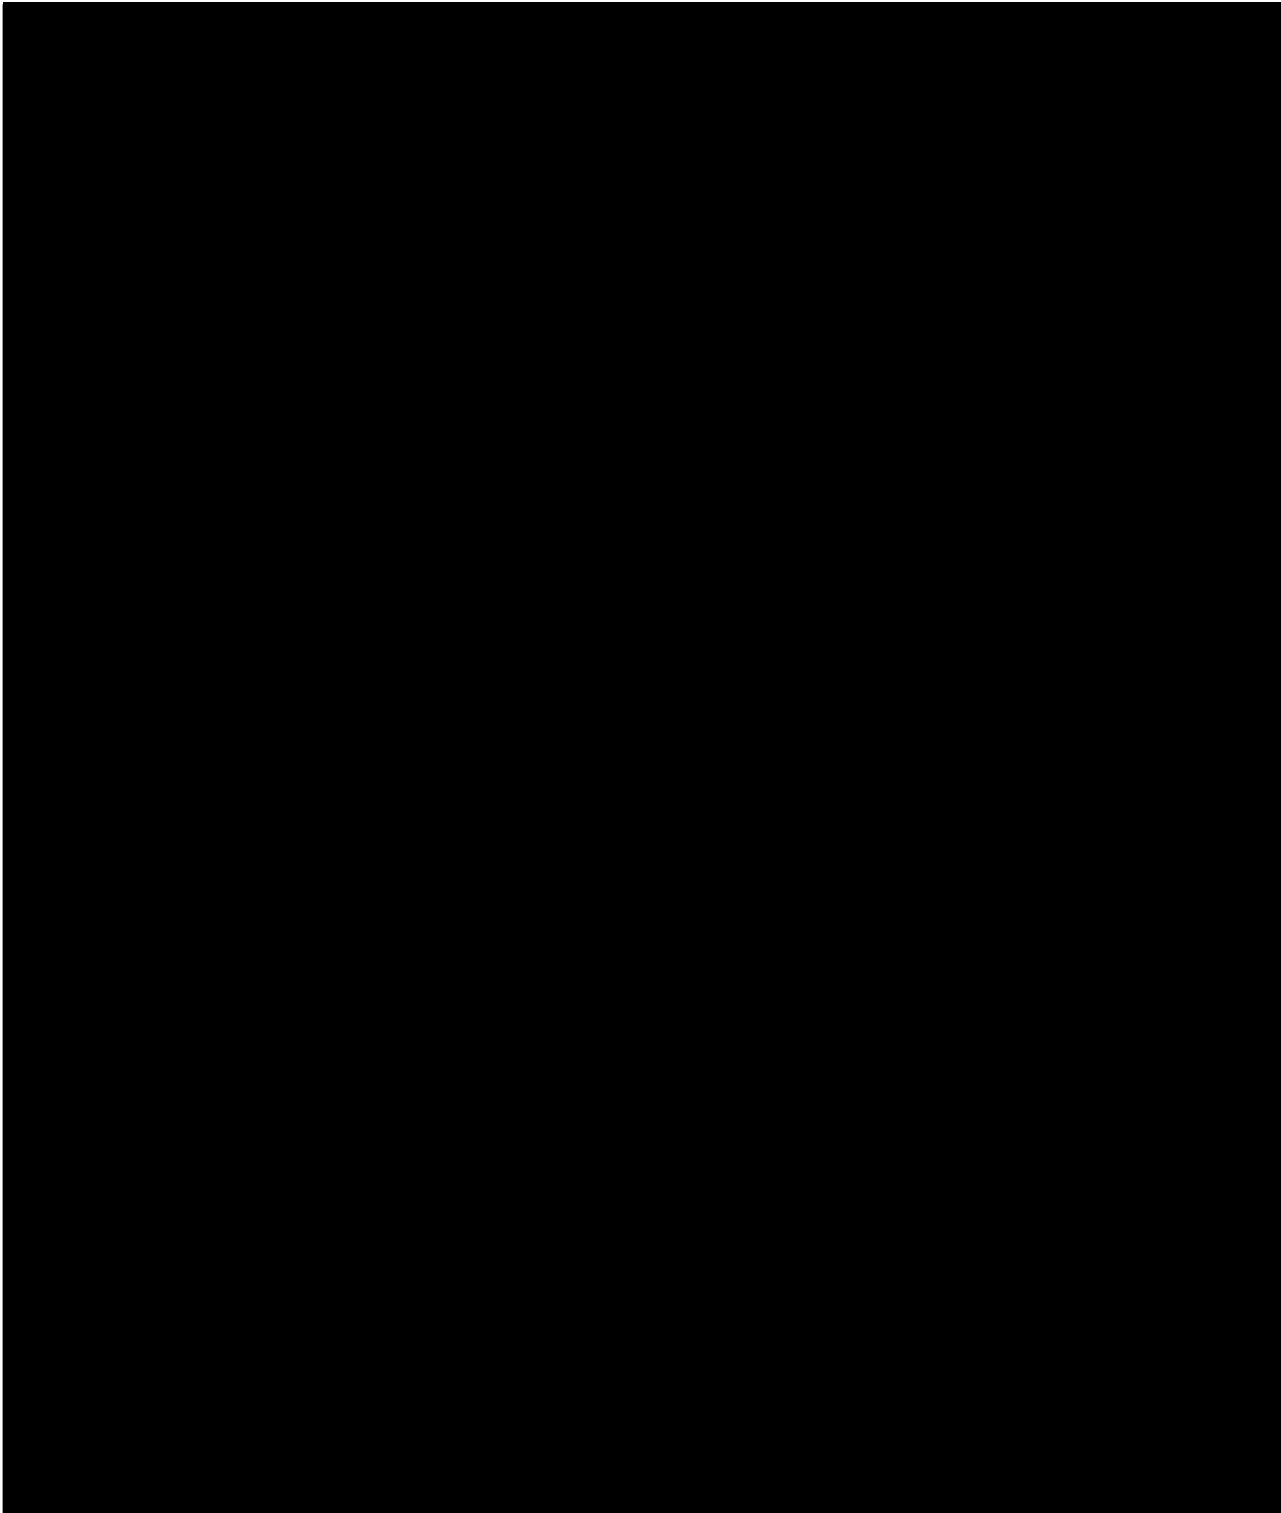

*"A little more interaction would be good, such an HP meeting, even just 1-2 times per semester would get us all on the same page."*

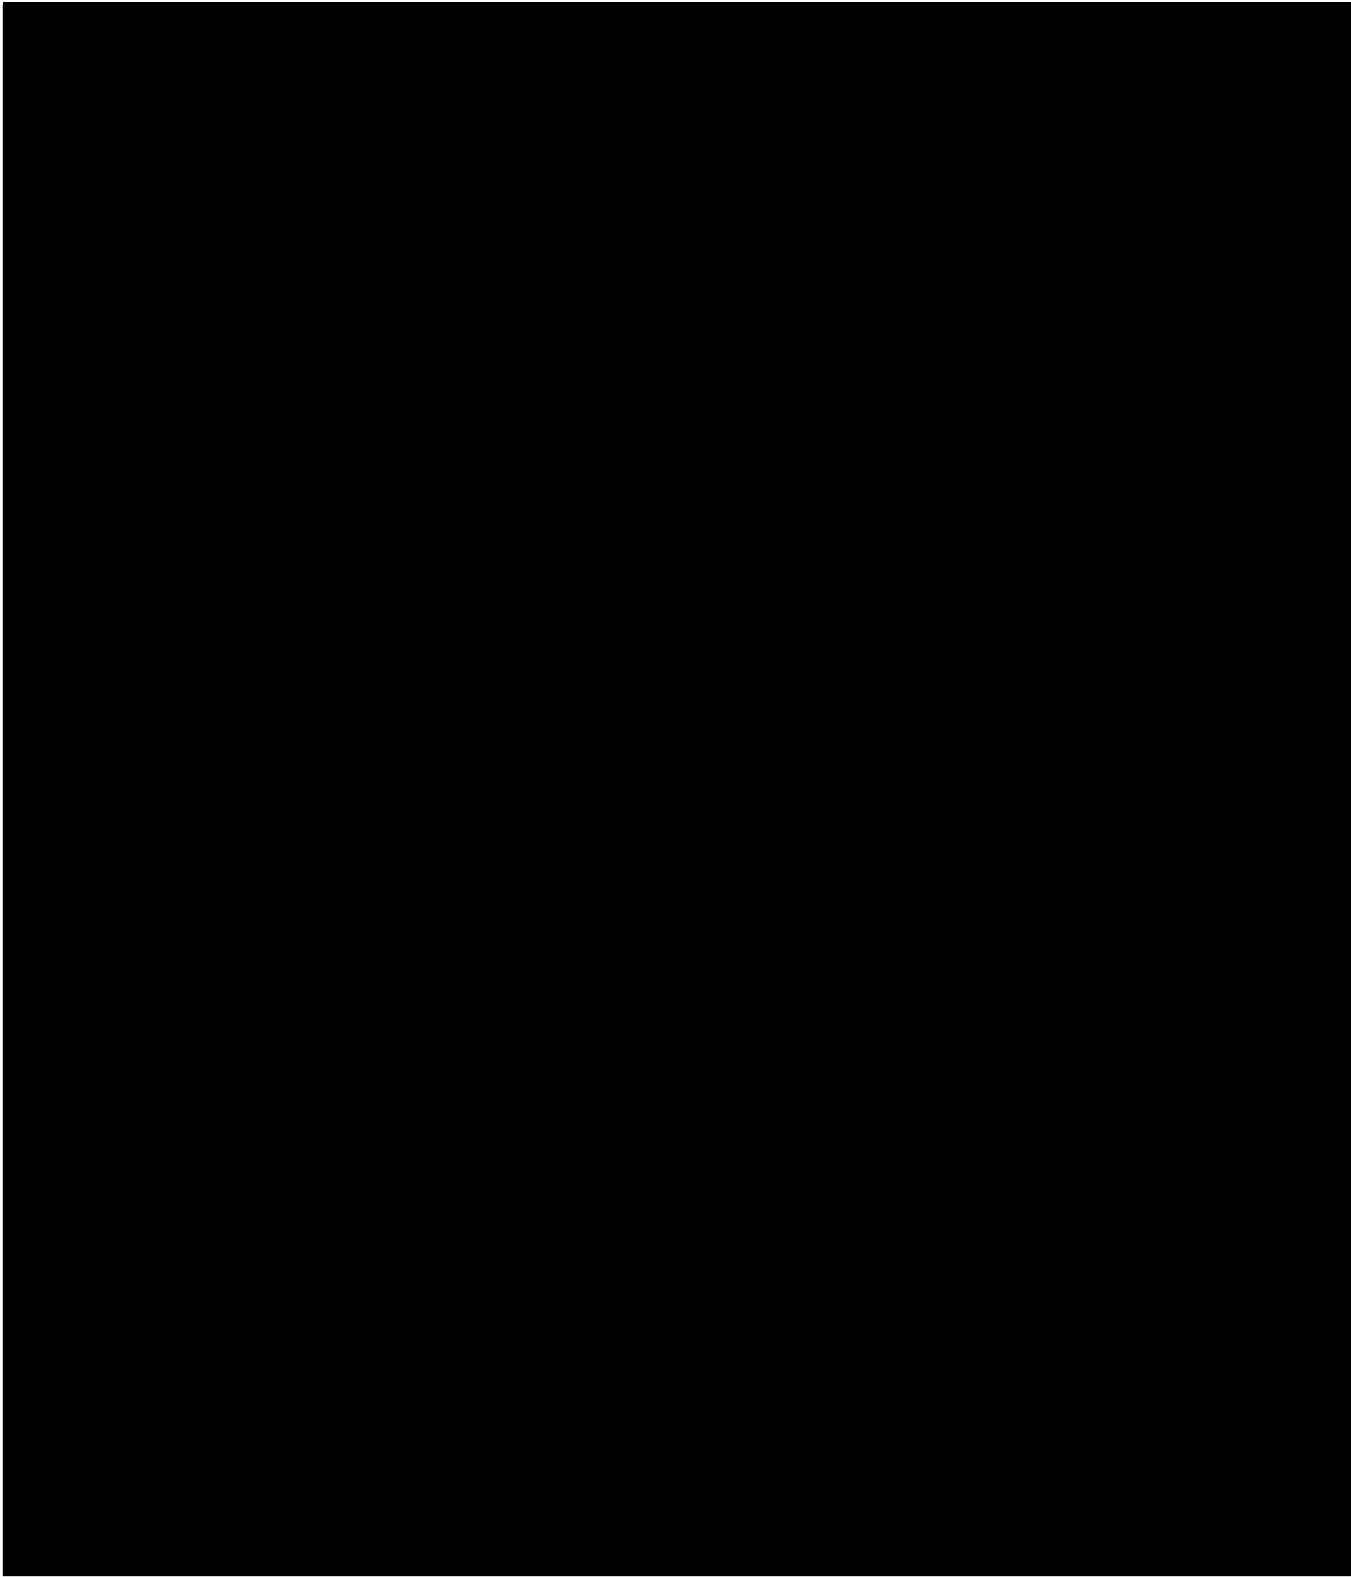

*"It would be good for me as the academic advisor to address the team at the beginning of each academic year, at a team meeting. I do so with Rugby and it sets a good academic tone for the beginning of the year where again, everyone starts and hopefully remains, on the same page."*
